ALL TEMP DISH DETERGENT

HUSKY® 145

Highly concentrated, non-foaming detergent designed for superior performance in both high and low temperature dish machines. Formulated with powerful alkaline builders and cleaning agents to break down heavy grease and food soils from everyday food service use.

Directions

1. Scrape and pre-rinse dishes to remove heavy soil.
2. Dilute product according to soil load and facility requirements (3–7 mL per gallon).
3. Ensure equipment is dosing properly using the titration method to test alkalinity.
4. Test multiple racks to ensure effective dilutions are met for your facility.

Note: Please read all label directions prior to use.

Features

- Effective in both high and low temperature dish machines
- Removes heavy grease and food soil buildup
- Highly concentrated formula
- Non-foaming
- Non-chlorinated
