

FlowBiotic+

Bio-Enzymatic Thickened Drain Maintainer

HUSKY® 402

A bio-enzymatic, fast-acting drain maintainer designed to lubricate and break down organic drain blockages and build-up. Its thickened formula clings to pipes and drain lines, increasing surface contact for improved efficacy.

Directions

- When treating drains and drainpipes, relieve the drain of as much water as possible. Identify the proper application amount based on the drain size. If a series of drains are clogged, use a bottom-up approach treating the last drain first and the first, last.
- For grease traps and holding tanks, apply 32 ounces of product daily until trap is cleared. Continue to treat grease traps daily with a drain maintainer to prevent buildup.
- A peristaltic pump may be desired when dispersing drain and grease trap maintainers.

Drain Size	Clogged Drains	Slow Drains
1 in.	8 oz.	4 oz.
2 in.	16 oz.	8 oz.
4 in.	32 oz.	16 oz.

NOTE: Do not subject this product to boiling water, disinfectants or chlorinated products. Do not use on food prep surfaces without a potable rinse.

Thickened formula clings to surfaces for improved performance.

Specs

Dilution: RTU
pH Level: 8.5-11.0
Color: Green
Fragrance: Eucalyptus Lavender
Pack Types: Quart, Gallon and 5-Gallon Pail

Features

- Thickened Formula Clings to Drain Surfaces
- First-Rate Biotics Powered by Fast-Acting Enzymes Drive Quicker Results
- Biotic-Compatible Solvents Improve Inorganic Soil Removal
- Lingering Lavender Fragrance Elevates User Experience and Provides Residual Odor Control

Recommended For

- Grease Traps
- Drains
- Pressure Washers
- Sump Pumps
- Toilets and Urinals
- Septic Systems
