

ALL TEMP DISH DETERGENT

145

Versatile in use for high and low temperature machines

Highly concentrated for superior performance

Non-foaming and non-chlorinated

NET CONTENTS: 5 U.S. Gallons

092520
Label# 7447F

This highly concentrated non-foaming cleaner is formulated for superior performance in both high and low temperature dish machines. The high concentration of both alkaline boosters and cleaning agents help break down and remove heavy grease and other build-up from everyday food service use.

DIRECTIONS FOR USE:

Spot clean heavy build-up and rinse dishes before use. Dilution may vary depending on facility type and level of soil build-up. Traditional usage is between 3-7 ml per gallon. Ensure the equipment is dosing properly using the titration method to test alkalinity. For peak performance, test multiple racks to ensure effective dilutions are met for your facility.

NOTES: Please read all directions on label before use.
