

ARENA PLUS DISINFECTANT

HUSKY® 892

A concentrated neutral pH formula cleans and disinfects in one step. This disinfectant has both bacteria and virus efficacy in only 5 minutes (including Norovirus) instead of the traditional 10 minute dwell times normally required by most disinfectants. As a neutral pH cleaner, this formula can be used on a wide range of surfaces, including finished floors.

Directions

1. To disinfect, hard non-porous surfaces add 1 ounce of this product per gallon of water.
2. Apply solution with a mop, cloth, sponge, hand pump trigger sprayer or low pressure coarse sprayer so as to wet all surfaces thoroughly.
3. Allow to remain visibly wet for up to 5 minutes (for the bacteria and viruses listed on back), then remove excess liquid.
4. For sprayer applications, spray 6-8 inches from surface and rub with brush, sponge or cloth.

Note: For visibly soiled areas, a pre-cleaning step is required.
